Frank Pastizzo, President
Warm Up the Workplace

Dear Frank:

The 2005 Professional Development Conference for Family and Consumer Sciences Teachers was a real success and your attendance and presentations were part of the reason the teachers felt they received information necessary to be a better teacher.

Another day cannot pass without me letting you know how timely your general session presentation was as we concluded the conference. You definitely provided information to the teachers in an entertaining way and gave them information that will be valuable to them as school begins. I hope the Family and Consumer Sciences teachers have warmed up the schools where they teach. The teachers loved the combination of humor, music and the lesson from CHERISH.

You cannot be thanked enough for being with us in Houston. Thank you for what you did to lighten up the lives of our teachers and help them understand the value of humor, compassion, tolerance, and recognition. You are a real asset to any conference!

Sincerely,

Sharon
